Adzuna API: what data is available

Coverage by country, volume and date range. Measured on 13 October 2026 with the free API key, 19 countries, about 230 API calls.

Summary

- **19 countries**, and no others. The API returns this list itself when asked for an unsupported country.
- **13.8 million live job ads** in total, from 11,749 (New Zealand) to 7.8 million (United States).
- **Job ads are a snapshot of today, not an archive.** Only ads that are still online are returned. 59 % were posted in the last 30 days and 94 % in the last 12 months. In the four countries checked, none is older than 5 years.
- **The only historical series is the monthly mean salary, and it covers exactly 12 months** (October 2025 to September 2026) in every country. It cannot be paged further back.
- **Collecting everything is not possible on the free tier**: all ads would need about 275,634 calls against a limit of 2,500 per month. A targeted plan is on the last page.

Types of data

Endpoint	What it returns	Time coverage	Volume per call
search	Individual job ads: title, description (first 500 characters), company, location, coordinates, category, contract type, salary range, posting date, link. Also the total number of matching ads and their mean salary.	Ads currently online	50 ads maximum
history	Mean advertised salary per month. Can be filtered by keyword, category or location.	Last 12 full months	12 values
histogram	Number of current ads per salary band.	Current only	7 bands
top_companies	Employers with the most current ads.	Current only	5 employers
geodata	Number of current ads per region.	Current only	8 to 54 regions
categories	Adzuna's job categories (same 30 in each country, labels in the local language).	Static	30 categories

search and history were called in all 19 countries. The other four endpoints were verified in Austria, the United States and India and are assumed to work the same way elsewhere.

Countries, volume and date ranges

Live ads are all ads returned by an unfiltered search. The newest ad in every country was posted on the day of measurement (13 or 14 October 2026 local time).

Country	Code	Live ads	Posted in last 30 days	Posted in last 12 months	Salary history
United States	us	7,795,357	4,664,983	96 %	Oct 2025 - Sep 2026
Germany	de	1,337,278	709,494	92 %	Oct 2025 - Sep 2026
France	fr	1,044,485	670,788	90 %	Oct 2025 - Sep 2026
Brazil	br	628,960	284,261	93 %	Oct 2025 - Sep 2026
United Kingdom	gb	621,984	443,806	96 %	Oct 2025 - Sep 2026
Italy	it	305,095	126,290	62 %	Oct 2025 - Sep 2026
South Africa	za	291,769	259,254	97 %	Oct 2025 - Sep 2026
Canada	ca	273,351	161,057	96 %	Oct 2025 - Sep 2026
India	in	243,004	88,117	82 %	Oct 2025 - Sep 2026
Australia	au	241,323	171,361	99 %	Oct 2025 - Sep 2026

Country	Code	Live ads	Posted in last 30 days	Posted in last 12 months	Salary history
Netherlands	nl	209,990	92,665	91 %	Oct 2025 - Sep 2026
Mexico	mx	185,030	89,003	96 %	Oct 2025 - Sep 2026
Spain	es	174,321	97,773	96 %	Oct 2025 - Sep 2026
Poland	pl	134,164	91,350	94 %	Oct 2025 - Sep 2026
Switzerland	ch	104,279	83,172	98 %	Oct 2025 - Sep 2026
Singapore	sg	78,008	46,202	98 %	Oct 2025 - Sep 2026
Belgium	be	66,219	44,611	95 %	Oct 2025 - Sep 2026
Austria	at	35,339	22,123	94 %	Oct 2025 - Sep 2026
New Zealand	nz	11,749	6,764	92 %	Oct 2025 - Sep 2026
All 19 countries		**13,781,705**	**8,153,074**	**94 %**	

The search also returns a mean salary per country, in local currency and not comparable across countries (Singapore's value looks monthly rather than yearly). It is in data/coverage/countries.csv.

Ads for four tech roles

Number of live ads containing the exact phrase in the title or description. This is the data relevant to our user stories, and it is a small fraction of the total.

Country	Data engineer	Data scientist	Software engineer	Machine learning engineer	Sum
United States	40,210	28,201	139,724	7,991	216,126
India	7,995	9,114	22,262	667	40,038
United Kingdom	2,735	3,907	8,023	437	15,102
Canada	2,191	2,921	6,351	337	11,800
South Africa	2,592	4,665	5,351	284	12,892
Singapore	1,438	2,942	3,887	337	8,604
Germany	1,153	1,092	2,842	176	5,263
Australia	1,209	1,236	2,801	102	5,348
Netherlands	541	260	1,992	57	2,850
Spain	703	400	1,542	130	2,775
Poland	817	466	1,400	81	2,764
France	1,538	1,383	980	125	4,026
Italy	454	406	599	65	1,524
Switzerland	135	134	593	25	887
Brazil	245	133	536	41	955
Mexico	221	84	433	38	776
New Zealand	70	67	197	4	338
Belgium	142	104	184	16	446
Austria	62	36	127	5	230
All 19 countries	**64,451**	**57,551**	**199,824**	**10,918**	**332,744**

An ad that mentions two of the phrases is counted in both columns, so the sum slightly overstates the number of distinct ads.

How far back the data goes

Job ads. There is no archive. The age of an ad is how long it has stayed online, so the old ones are leftovers that were never taken down, not a record of the past. Counted in four countries:

Country	Under 1 year	1 to 2 years	2 to 3 years	3 to 5 years	Over 5 years
Austria	94 %	1,809	265	8	0
United Kingdom	96 %	18,588	5,160	682	0
Germany	92 %	95,726	11,809	1,893	0
United States	96 %	217,862	85,861	16,112	0

The 'under 1 year' share uses the main measurement; the other columns were counted a few minutes later, so totals differ by a fraction of a percent. For the UK and Germany the first column is therefore approximate.

Salary history. The endpoint returned the same 12 months when asked for 13, 24, 60, 120 and 240 months, and it rejects requests with any date-range parameter. Going back year by year is therefore not possible. A longer series only builds up if we call it every month and keep the results: each month adds one new month.

Limits

- **Call limits (Adzuna's terms page):** 25 per minute, 250 per day, 1,000 per week, 2,500 per month. About 230 of today's 250 are used.
- **Page size:** 50 ads per call, even if more are requested. Pages as deep as 2,000 still return ads, but the order on deep pages was not consistent in one test, so ads must be de-duplicated by id.
- **Description:** cut to 500 characters. Full text is only on the linked web page.
- **No ascending date sort:** the oldest ads cannot be requested directly; the age filter (max_days_old) is the only way to slice by date.
- **Terms of use:** the terms page says academic users get a 14-day trial and need Adzuna's written consent for ongoing research, including aggregated figures such as vacancy counts and mean salaries, and that Adzuna must be credited as the source. This should be read in full and, if needed, cleared with Adzuna before the project relies on it.

Collection strategy within the free tier

How often	What	Calls	What it gives us
Monthly	Salary history for all 19 countries	19	Extends the 12-month salary series by one month each time
Weekly	Ad count and mean salary for each role in each country (4 roles x 19 countries)	76	Our own demand time series per role and country, which Adzuna does not provide
Weekly	New ads of the last 7 days for the four roles in a few chosen countries, 50 per call, de-duplicated by id	depends on countries	Ad texts for keyword analysis, growing week by week
Once	Backfill of all current ads for the four roles in the chosen countries	ads / 50	Starting stock: for example Austria 5 calls, Germany about 105, UK about 300

All four roles in all 19 countries would be about 6,654 calls for the backfill alone, which is nearly three months of quota. Europe without the US and India is realistic; the US is not.
