Adzuna API: IT job ads available

Ads in Adzuna's category "IT Jobs" (tag it-jobs) by country, volume and date range. Measured on 13 October 2026 with the free API key, 19 countries.

Can we collect all IT ads?

- **Not all of them worldwide.** There are **916,632 live IT ads** in the 19 countries. At 50 ads per call that is 18,341 calls, about 7.3 months of the 2,500-call monthly quota. The United States alone holds 59 % of them.
- **Europe is feasible.** The 10 European countries have 127,455 IT ads, about 2,554 calls, which is roughly one month of quota. Every country except the US together: 379,466 ads, 7,597 calls, about 3.0 months.
- **Keeping it up to date is cheaper than the first collection**, because only new ads are needed. In Europe about 80,493 IT ads were posted in the last 30 days, which is about 1,609 calls per month.
- **Date range is the same as for all ads:** only ads that are still online, 59 % of them posted in the last 30 days and 95 % in the last 12 months. The monthly mean IT salary covers October 2025 to September 2026 in every country and cannot be extended backwards.
- **The IT category misses relevant ads.** Adzuna assigns the category automatically. In our Austrian sample of 101 "data engineer" ads only 36 were in the IT category and 41 had no category at all. Collecting by category should be combined with keyword searches for the roles we care about.

Types of data, filtered to IT

Endpoint	What it returns for category it-jobs	Time coverage	Checked in
search	Individual IT ads: title, description (first 500 characters), company, location, coordinates, contract type, salary range, posting date, link. Also the number of IT ads and their mean salary.	Ads currently online	All 19 countries
history	Mean advertised IT salary per month.	Oct 2025 - Sep 2026	All 19 countries
histogram	Number of current ads per salary band.	Current only	Not with this filter
top_companies	Employers with the most current ads.	Current only	Not with this filter
geodata	Number of current ads per region.	Current only	Not with this filter

The last three endpoints were tested with a keyword filter in Austria, the United States and India; they were not called with the category filter.

IT ads per country: volume, age and date ranges

The newest IT ad in every country is from the day of measurement. "Calls" is the number of API calls needed to download all of a country's IT ads once.

Europe: Austria, Belgium, Switzerland, Germany, Spain, France, United Kingdom, Italy, Netherlands, Poland. The exact age of the ads older than 12 months was not measured for the IT category; across all categories nearly all such ads are 1 to 3 years old and none is older than 5 years (four countries checked). The mean IT salary per country is in data/coverage/countries_it_jobs.csv, in local currency.

Cross-check: ads for four tech roles, any category

Number of live ads containing the exact phrase, without the category filter. These are the ads our user stories are about; many of them are not in the IT category, so they are not a subset of the table on the previous page.

An ad that mentions two of the phrases is counted in both columns.

Limits

- **Call limits (Adzuna's terms page):** 25 per minute, 250 per day, 1,000 per week, 2,500 per month. About 300 calls went through today without a rejection, so the daily limit is not strictly enforced, but a plan should not depend on that.
- **Page size:** 50 ads per call. Pages as deep as 2,000 (100,000 ads) returned ads in a test, but the order on deep pages was not consistent, so ads must be de-duplicated by id. Splitting a large country into smaller requests (by region or by posting age) avoids very deep pages.
- **Description:** cut to 500 characters. Full text is only on the linked web page.
- **No archive and no ascending date sort:** removed ads are gone; the age filter (max_days_old) is the only way to slice by date.
- **Terms of use:** the terms page says academic users get a 14-day trial and need Adzuna's written consent for ongoing research, including aggregated figures such as vacancy counts and mean salaries, and that Adzuna must be credited as the source. Bulk collection of all IT ads is the kind of use that should be cleared with Adzuna first; they also grant higher limits on request.

Collection strategy for IT ads within the free tier

How often	What	Calls	What it gives us
Once	All current IT ads in the 10 European countries, spread over five to six weeks to stay inside the weekly and monthly limits	2,554	Starting stock of 127,455 ads. Austria alone: 26 calls
Weekly	IT ads of the last 7 days in the same countries, de-duplicated by id	about 374	Keeps the collection current and records when ads appear
Weekly	IT ad count and mean salary per country (1 call each), plus the four role keywords (4 calls each)	95	Demand time series per country and role, which Adzuna does not provide
Monthly	IT salary history for all 19 countries	19	Extends the 12-month IT salary series by one month each time

Once the starting stock is in, this needs roughly 2,037 calls per month, inside the 2,500 limit. The weekly figure assumes new ads arrive at the pace of the last 30 days.
